

Mafunzo Licensing API

Integration guide for the warehouse licensing application
Generated: 2026-08-01 16:44 · WRRB Mafunzo

API for the warehouse **licensing application** to list WRRB-trained staff, nominate them for license seats, and report license lifecycle events back to Mafunzo.

Base path: `/api/v1/licensing`

Authentication

All endpoints require a shared API token.

Header	Value
Authorization	Bearer <LICENSING_API_TOKEN>
Accept	application/json
Content-Type	application/json (for POST bodies)

Alternative header (same token): `X-Licensing-Token: <LICENSING_API_TOKEN>`

Configure the token in Mafunzo `.env` :

```
LICENSING_API_TOKEN=your-long-random-secret
LICENSING_NOMINATION_EXPIRES_DAYS=7
```

Auth errors

Status	Meaning
401	Missing or invalid token
503	<code>LICENSING_API_TOKEN</code> not configured on Mafunzo

```
{ "message": "Unauthenticated." }
```

Lifecycle overview

Stage	Who acts	Effect
Pending	Licensing app nominates; trainee Accept/Reject	Multiple companies may nominate the same person
Accepted	Trainee accepts	Person is reserved ; cannot accept another nomination; hidden from trained-staff list
Licensed	Licensing app calls <code>issue</code>	Remains reserved until <code>license_valid_until</code> (or revoke)
Cancelled / Revoked / Expired / Rejected	Trainee, licensing app, or timeout	Person becomes available again

Eligible positions

Key (send this)	Label	Aliases accepted
<code>manager</code>	Manager	—
<code>documentation</code>	Documentation	—
<code>quality_assurance</code>	Quality Assurance	<code>qa</code>
<code>weight_assistant</code>	Weight Assistant	<code>weight_clerk</code> , <code>weight</code>
<code>store_keeper</code>	Store Keeper	<code>storekeeper</code>

Endpoints

1. List trained staff

```
GET /api/v1/licensing/trained-staff
```

Returns staff who completed training/payment, passed the exam, have a registration number, hold an eligible final position, and are **not** currently reserved or under an active license.

Query parameters

Parameter	Type	Required	Description
<code>position</code>	string	no	Filter by one or more positions (comma/space separated). Example: <code>manager,quality_assurance</code>
<code>registration_number</code>	string	no	Exact registration number
<code>q</code>	string	no	Search name or registration number
<code>course_id</code>	integer	no	Filter by course
<code>session_year</code>	integer	no	Filter by course session year
<code>per_page</code>	integer	no	Page size (1-100)
<code>page</code>	integer	no	Page number

Example

GET /api/v1/licensing/trained-staff?position=store_keeper&q=Kinabo&per_page=20
Authorization: Bearer <token>

Response 200

```
{
  "data": [
    {
      "registration_number": "WRRB/2026/1/0004",
      "full_name": "Mary A Kinabo",
      "final_position": "store_keeper",
      "final_position_label": "Store Keeper",
      "course_id": 5,
      "session_year": 2026
    }
  ],
  "meta": {
    "current_page": 1,
    "per_page": 20,
    "total": 1,
    "last_page": 1,
    "eligible_positions": {
      "manager": "Manager",
      "documentation": "Documentation",
      "quality_assurance": "Quality Assurance",
      "weight_assistant": "Weight Assistant",
      "store_keeper": "Store Keeper"
    }
  }
}
```

2. Create nomination

POST /api/v1/licensing/nominations

Creates a nomination and notifies the trainee in Mafunzo (Accept / Reject). Pending nominations expire after **7 days** (configurable).

Idempotent: repeating the same `licensing_application_id` + `registration_number` + `final_position` while still pending returns the existing nomination.

Body

Field	Type	Required	Description
registration_number	string	yes	WRRB registration number
final_position	string	yes	Eligible position key (or alias)
licensing_application_id	string	yes	Your license application ID
organization_name	string	no	Shown to the trainee
callback_url	url	no	Mafunzo POSTs status updates here

Example

```
POST /api/v1/licensing/nominations
Authorization: Bearer <token>
Content-Type: application/json

{
  "registration_number": "WRRB/2026/1/0004",
  "final_position": "store_keeper",
  "licensing_application_id": "LA-2026-100",
  "organization_name": "Demo Warehouse Ltd",
  "callback_url": "https://licensing.example.com/hooks/mafunzo"
}
```

Response 201

```
{
  "message": "Nomination created. The trainee has been notified.",
  "data": {
    "id": 12,
    "registration_number": "WRRB/2026/1/0004",
    "final_position": "store_keeper",
    "final_position_label": "Store Keeper",
    "licensing_application_id": "LA-2026-100",
    "organization_name": "Demo Warehouse Ltd",
    "status": "pending",
    "is_reserved": false,
    "license_number": null,
    "license_issued_at": null,
    "license_valid_from": null,
    "license_valid_until": null,
    "expires_at": "2026-08-08T10:00:00+00:00",
    "responded_at": null,
    "created_at": "2026-08-01T10:00:00+00:00"
  }
}
```

Errors

Status	When
422	Invalid position, person not eligible, or person already reserved/licensed

3. List nominations for a license application

GET /api/v1/licensing/nominations?licensing_application_id=LA-2026-100

Parameter	Required	Description
licensing_application_id	yes	Your license application ID

Response 200

```
{
  "data": [
    {
      "id": 12,
      "registration_number": "WRRB/2026/1/0004",
      "final_position": "store_keeper",
      "final_position_label": "Store Keeper",
      "licensing_application_id": "LA-2026-100",
      "organization_name": "Demo Warehouse Ltd",
      "status": "accepted",
      "is_reserved": true,
      "license_number": null,
      "license_issued_at": null,
      "license_valid_from": null,
      "license_valid_until": null,
      "expires_at": "2026-08-08T10:00:00+00:00",
      "responded_at": "2026-08-02T09:15:00+00:00",
      "created_at": "2026-08-01T10:00:00+00:00"
    }
  ]
}
```

4. Get one nomination

```
GET /api/v1/licensing/nominations/{id}
```

Poll trainee response and license state.

Response 200

```
{
  "data": { "...same nomination object as above..." }
}
```

5. Issue license (licensing system → Mafunzo)

```
POST /api/v1/licensing/nominations/{id}/issue
```

Call this when the licensing application **issues** the warehouse license. Nomination must be `accepted`. Staff remain reserved until validity ends (or revoke).

Body

Field	Type	Required	Description
<code>license_number</code>	string	no	External license number
<code>license_valid_from</code>	date	yes	YYYY-MM-DD
<code>license_valid_until</code>	date	yes	YYYY-MM-DD (≥ <code>license_valid_from</code>)

Example

```
POST /api/v1/licensing/nominations/12/issue
Authorization: Bearer <token>
Content-Type: application/json

{
  "license_number": "LIC-2026-001",
  "license_valid_from": "2026-08-01",
  "license_valid_until": "2027-07-31"
}
```

Response 200

```
{
  "message": "License recorded. Staff member remains reserved until validity ends.",
  "data": {
    "id": 12,
    "status": "licensed",
    "is_reserved": true,
    "license_number": "LIC-2026-001",
    "license_issued_at": "2026-08-01T12:00:00+00:00",
    "license_valid_from": "2026-08-01",
    "license_valid_until": "2027-07-31",
    "...": "..."
  }
}
```

Errors

Status	When
422	Nomination is not in <code>accepted</code> status, or validation failed

6. Cancel nomination or revoke license

```
POST /api/v1/licensing/nominations/{id}/cancel
```

Current status	Result
<code>pending</code>	→ <code>cancelled</code>
<code>accepted</code>	→ <code>cancelled</code> (releases reservation)
<code>licensed</code> (still valid)	→ <code>revoked</code> (staff available again)
other	422 — nothing to cancel

Response 200

```
{
  "message": "Nomination cancelled. Reservation released if it was accepted.",
  "data": {
    "id": 12,
    "status": "cancelled",
    "is_reserved": false
  }
}
```

7. Submit change request (company → WRRB approval)

Position / organization updates and early release require **WRRB staff approval** in Mafunzo Application Management. Either the company (this API) or the trainee (Mafunzo UI) can submit a request. Only **one pending** request per nomination is allowed.

Allowed when nomination is `accepted` or actively `licensed`.

```
POST /api/v1/licensing/nominations/{id}/change-requests
```

Body

Field	Type	Required	Description
change_type	string	yes	<code>update</code> or <code>release</code>
proposed_final_position	string	for update*	New eligible position key
proposed_organization_name	string	for update*	New organization name
reason	string	no	Why the change is needed

* For `update`, at least one of position or organization must differ from current values.

Example — change position

```
POST /api/v1/licensing/nominations/12/change-requests
Authorization: Bearer <token>
Content-Type: application/json

{
  "change_type": "update",
  "proposed_final_position": "manager",
  "reason": "Promoted to warehouse manager seat"
}
```

Example — request release

```
{
  "change_type": "release",
  "reason": "Staff left the warehouse"
}
```

Response `201`

```
{
  "message": "Change request submitted for WRRB approval.",
  "data": {
    "id": 3,
    "license_nomination_id": 12,
    "requested_by": "company",
    "change_type": "update",
    "current_final_position": "store_keeper",
    "proposed_final_position": "manager",
    "current_organization_name": "Demo Warehouse Ltd",
    "proposed_organization_name": "Demo Warehouse Ltd",
    "reason": "Promoted to warehouse manager seat",
    "status": "pending",
    "review_notes": null,
    "reviewed_at": null,
    "created_at": "2026-08-01T16:00:00+00:00",
    "summary": "Position: Store Keeper → Manager"
  }
}
```

8. List change requests for a nomination

```
GET /api/v1/licensing/nominations/{id}/change-requests
```

Response 200

```
{
  "data": [ { "...change request object..." } ]
}
```

9. Get / cancel a change request

```
GET /api/v1/licensing/change-requests/{id}
POST /api/v1/licensing/change-requests/{id}/cancel
```

Cancel is only for **pending** requests (withdraw before WRRB decides).

WRRB staff approval (Mafunzo UI)

Path: **Application Management → License change requests**

- Staff approve → changes are applied (position/org updated, or engagement released via cancel/revoke)
- Staff reject → nomination unchanged; trainee is notified
- Optional callback to licensing app with event: `license_change_request`

Nomination object fields

Field	Description
<code>id</code>	Mafunzo nomination ID
<code>registration_number</code>	WRRB registration number
<code>final_position</code>	Position key
<code>final_position_label</code>	Human-readable position
<code>licensing_application_id</code>	Your application ID
<code>organization_name</code>	Organization shown to trainee
<code>status</code>	<code>pending</code> , <code>accepted</code> , <code>licensed</code> , <code>rejected</code> , <code>expired</code> , <code>cancelled</code> , <code>revoked</code>
<code>is_reserved</code>	<code>true</code> while accepted or under active license
<code>license_number</code>	Set after <code>issue</code>
<code>license_issued_at</code>	ISO 8601 timestamp
<code>license_valid_from</code>	YYYY-MM-DD
<code>license_valid_until</code>	YYYY-MM-DD
<code>expires_at</code>	Pending response deadline (ISO 8601)
<code>responded_at</code>	When trainee/system responded
<code>created_at</code>	Created timestamp

Callback (optional)

If `callback_url` was provided when creating the nomination, Mafunzo POSTs the **full nomination object** (same fields as above) to that URL when status changes (accept, reject, issue, cancel/revoke).

```
POST https://licensing.example.com/hooks/mafunzo
Content-Type: application/json
```

```
{
  "id": 12,
  "registration_number": "WRRB/2026/1/0004",
  "final_position": "store_keeper",
  "status": "accepted",
  "is_reserved": true,
  "...": "..."
}
```

Licensing apps should still **poll** `GET /nominations/{id}` as a backup if the callback fails.

Trainee actions in Mafunzo (not API)

Trainees respond inside Mafunzo (notification → nomination page):

- **Accept** — reserves them for that company until license issued / cancelled / revoked / validity ends

- **Reject** — frees them for other nominations

While reserved, Accept on any other pending nomination is blocked.

Recommended integration sequence

1. GET /trained-staff — pick eligible people by position
 2. POST /nominations — nominate (trainee is notified)
 3. Poll GET /nominations/{id} (and/or handle callback) until accepted or rejected / expired
 4. If accepted and license is granted → POST /nominations/{id}/issue with validity dates
 5. If application withdrawn / license revoked → POST /nominations/{id}/cancel
 6. For position/org changes or early release → POST /nominations/{id}/change-requests → wait for WRRB approve/reject (poll change-request or callback)
